Leonardo Oliveira e Silva

FULL-STACK DEVELOPER

Senior Full-Stack Developer with 5+ years of experience delivering scalable web applications and modern digital experiences for multinational companies and innovative startups. Specialized in front-end development with strong expertise in performance optimization, accessibility, SEO, and user experience.

Experienced in end-to-end project delivery, from architecture and implementation to code reviews, testing, and production support. Strong collaborator with cross-functional teams, focused on maintaining high engineering standards and delivering scalable, high-quality solutions.

Passionate about solving technical challenges and continuously learning new technologies, including modern AI platforms, cloud solutions, and scalable front-end architectures.

Experience

- 2025 - Current
Meijer
Senior Full-Stack Developer | React, Java & AEM
Working on enterprise digital commerce solutions for Meijer, focused on React, Java, and Adobe Experience Manager (AEM). Led the migration of a legacy weekly ad platform from a third-party vendor to a fully in-house shoppable ad experience, allowing customers to browse products and add items directly to cart. Improved performance through lazy loading strategies, accessibility best practices, and scalable GraphQL integrations. Also responsible for production support, code reviews, CI/CD workflows, and development of Java services and React applications using modern engineering practices and AI-assisted tools such as GitHub Copilot.
- 2023 - 2024
Contabilizei
Full-Stack Web Developer
Developed and redesigned scalable web applications, Vue components, and REST APIs with strong focus on SEO, UX/UI, and performance optimization. Collaborated closely with stakeholders, conducted code reviews, and maintained high engineering standards across the team. Worked with React, Vue 3, Nuxt 3, TypeScript, PHP, Jest, GCP, and CI/CD workflows.
- 2022 - 2023
Compass.uol
Full-Stack Web Developer | AEM
Worked on end-to-end development for one of Brazil's largest telecommunications companies, building scalable AEM components, pages, and integrations using Java, JSP, JavaScript, React, and Vue. Improved authoring experiences, optimized reusable components, and ensured code quality through Cypress testing. Also contributed to Workfront/Fusion integrations, Jira and Trello automations, and Salesforce-related reporting workflows.
- 2021 - 2022
Globant
Front-End Web Developer | AEM
Collaborated with Marketing and BI teams to enhance the digital platform of one of Brazil's largest newspapers. Developed landing pages, improved legacy systems, and created reusable AEM components focused on performance and user experience. Worked with AEM, React, PHP Laravel, Sass, Docker, Jenkins, and GitLab CI/CD workflows, while supporting automation processes through Workfront.
